

Cancer Guidance & Support Services

Independent, Expert Guidance for You and Your Family

Our Cancer Guidance & Support Services help people with cancer obtain the most promising treatments, minimise their stress, and maximise their ability to live longer, healthier lives.

For more than 18 years and with more than 500 years of combined experience, Private Health Management's team of cancer experts has provided our clients with access to the best possible cancer care to help achieve superior outcomes.

While cancer diagnostics and treatments are advancing at an unprecedented rate, the healthcare system has become increasingly complex. Identifying and accessing the most effective care is both more challenging and more important than ever.

We understand how complex cancer is

We stay current on the latest diagnostic tools and closely follow the rapidly evolving treatment landscape. We leverage the experience and guidance of top cancer experts, draw on the learnings of medical literature research, and analyze the most promising treatments.

We go beyond the traditional standard of care to explore all promising treatments including targeted therapies, immunotherapies, therapeutic vaccines, and treatments being evaluated in clinical trials.

We help you access the most experienced and advanced physicians for your specific cancer diagnosis.

We are independent of all health systems and health plans so that we can focus solely on you without bias. While we have relationships with the top experts, our allegiance is only to you.

We provide the resources you need

- Dedicated Personal Care Team
- Advanced Molecular Profiling
- World-Class Cancer Experts
- Exploration of All Viable Options
- Delivery of Innovative and Emerging Treatments
- AI-Powered Medical Literature Research
- Access to Clinical Trials of New Treatments

- Minimisation of Side Effects
- Treatment Response Monitoring
- Decision Support
- Cost Management

Advancing Hyper-Personal Medicine Beyond Standard of Care

PHM leverages advanced molecular profiling, emerging therapies, and clinical trial opportunities to help you and your family stay ahead of cancer's challenges. Our approach includes:

Diagnostics and Personalised Profiling

- Advanced Molecular Profiling Technologies
- Using Genetic Mutations to Inform Treatment Decisions
- Identification of Relevant Drugs Approved for Other Indications

Expert Independent Guidance

- Consultations with World-Class Cancer Experts
- Science-Backed Decision Support
- Exploration of the Most Viable Options
- Intelligence on Emerging Treatments

Medical Breakthrough Innovations

- Access to Therapeutic Vaccines in and outside of U.S.
- Identification and Access to Clinical Trials for Promising New Treatments
- Participation in N-of-1 Clinical Trials

Proactive Disease Monitoring and Management

- Proactive Treatment Response Monitoring
- Surveillance for Cancer Recurrence
- Active Side Effect Management

Comprehensive Expert Resources to Support, Guide, and Educate

Provide Supportive Care

We engage appropriate specialists, including nutritionists, psychosocial support specialists, physical therapists, trainers, private duty nurses, and others to ensure you are holistically supported.

Minimise Side Effects

We proactively address issues of quality of life during treatment, and work with your physicians to implement strategies that minimise side effects whenever possible.

Offer Decision Support

We help you understand your health status and support you and your family in making key decisions about your care.

Partner with Your Doctors

We work closely with your trusted specialists or help you find additional experts. By providing the latest in-depth research and knowledge of advanced treatment options to busy doctors, we serve as a trusted resource to help all the doctors on your team do their best work.

Monitor Treatment Response

We ensure imaging and laboratory studies are regularly and properly conducted to catch any signs of poor treatment response or disease recurrence. We have contingency plans in place if additional or alternative treatment is needed.

Manage and Coordinate Logistics

We manage all your care logistics, including scheduling appointments and coordinating and communicating with everyone involved with your care.

Personalised Approach and Expansive Resources

World-class resources and highly tuned systems to achieve the best medical care and outcomes available

Dedicated Support from Your Personal Care Team

Our clinicians and research scientists lead the way to ensure you understand your diagnosis and provide guidance to enable you to make informed decisions about your treatment.

- Advanced Practice Clinicians
- PhD Research Scientists
- Care Logistics Specialists
- Medical Records Specialists

Access to Top Cancer Experts Providing Personalised Care

Cancer requires precision-oriented care. We work closely with leading oncology specialists to determine precisely the right care plan for your exact cancer.

- Consulting Cancer Experts
- Curated Expert Network of 1600+ Top Oncology Specialists

Treatment Path Decision Support Using Deep Research & Insights

Our own research team continuously identifies, investigates, and evaluates innovative technologies, including novel drugs and devices, new diagnostic modalities, and clinical trials.

- Individualised Research
- Access to Cutting Edge Treatments
- Global Alternatives

Cancer Guidance & Support Services

Hear from Our Clients

*How much value would I put on **an extra 3 years with my father?**
It's priceless.*

*PHM has **changed the narrative of my wife's care.** Our personalised PHM Team saved my wife's life. PHM will always be a part of my family."*

*There is so much rapid movement in cancer and cancer research.
PHM is on top of all of it.*

*PHM held my hand the whole way through and built a base of my genetic health. **I don't know where we would have been had we not had Private Health.***
